Education

Bachelor of Science

UNIVERSITY OF NEBRASKA—LINCOLN, LINCOLN, NE (2006-2011)

- Major: Mathematics, Minor: Computer Science
- Graduated with Honors

Experience

Senior Software Engineer

GEOTIX, TRAVERSE CITY, MI (WORKED REMOTELY) (2018-2020)

- Maintained and improved Geotix event ticketing platform, which serves over 100 local media companies and network partners, each with dozens of event organizers
- Lead developer on brand new features such as user notifications, venue customization, and public API (with documentation)
- Implemented and monitored revenue distribution, updated fee structures, and Stripe Connect framework for business selling \$20M in tickets per year
- Worked with outside mobile app team to handle updating internal APIs and other features

Senior Web Applications Engineer

UNIVERSITY OF NEBRASKA—LINCOLN, LINCOLN, NE (2015-2018)

- Project manager and lead developer for several campus-wide public services including UNL Events calendar, UNL Lockup Factory, UNL Resource Scheduler, and UNL Directory
- Provided support for these and other applications to dozens of developers across campus
- Developed and deployed UNL's award-winning web framework, encompassing all university websites in to one look and feel

Senior Web Developer

ARCHIVAL, LINCOLN, NE (2014)

- Built Adidas Playbook, a tool for Adidas field agents to schedule store visits, file reports, and share experiences
- Implemented and managed site search (via Elasticsearch and Lucene) on several site forums, blogs, and archives
- Worked with designers to prototype and build responsive web experiences for clients

Senior Software Engineer

FIRESRING, LINCOLN, NE (2013-2014)

- Lead developer for PaymentSpring, a user-friendly payment processing gateway
- Programmed core features including recurring billing system PCI compliance, and online receipt management
- Managed development priorities, testing practices, and quality assurance
- Provided support for developers utilizing the API

Software Engineer

FIRESRING, LINCOLN, NE (2011-2013)

- Managed website for St. Baldrick's Foundation, a non-profit raising money for childhood cancer research
- Developed Ruby API for mobile apps, managed PHP/Apache server architecture, and created responsive design for website raising over \$33 million per year
- Improved donation processes and user experience to raise donations by over \$5 million each year
- Integrated Facebook and Twitter to drive social media exposure
